Comments On 12/02/2004, a personal interview took place between Examiner Felton and Applicant's representatives, Mr. Stewart and Mr. Callagher. During the interview, Applicant's representatives explained the invention covered by the subject patent application and outlined for the Examiner important features of the Amendment filed 11/29/2004. Among those important features is the particle size range now recited for the aluminum hydroxide component of the claimed compositions. Applicant's representatives also indicated to the Examiner how the Declaration under 37 CFR §1.132 of Jianzhou WU which was filed with that Amendment supports the importance and significance of the aluminum hydroxide particle size range as recited in the claims of the subject application. The Examiner indicated that she would keep these points in mind as she considered the 11/29/2004 Amendment.

Very truly yours,

Raymond C. Stewart # 21,066
